

Cara Membuat Task Scheduler Pada Windows

1. Silakan buka aplikasi “Task Scheduler”, jika Anda kesulitan menemukannya silakan tekan tombol windows pada laptop/Computer, kemudian ketik “Task Scheduler”.
2. Buka aplikasi tersebut, kemudian pilih “Create Basic Task”,

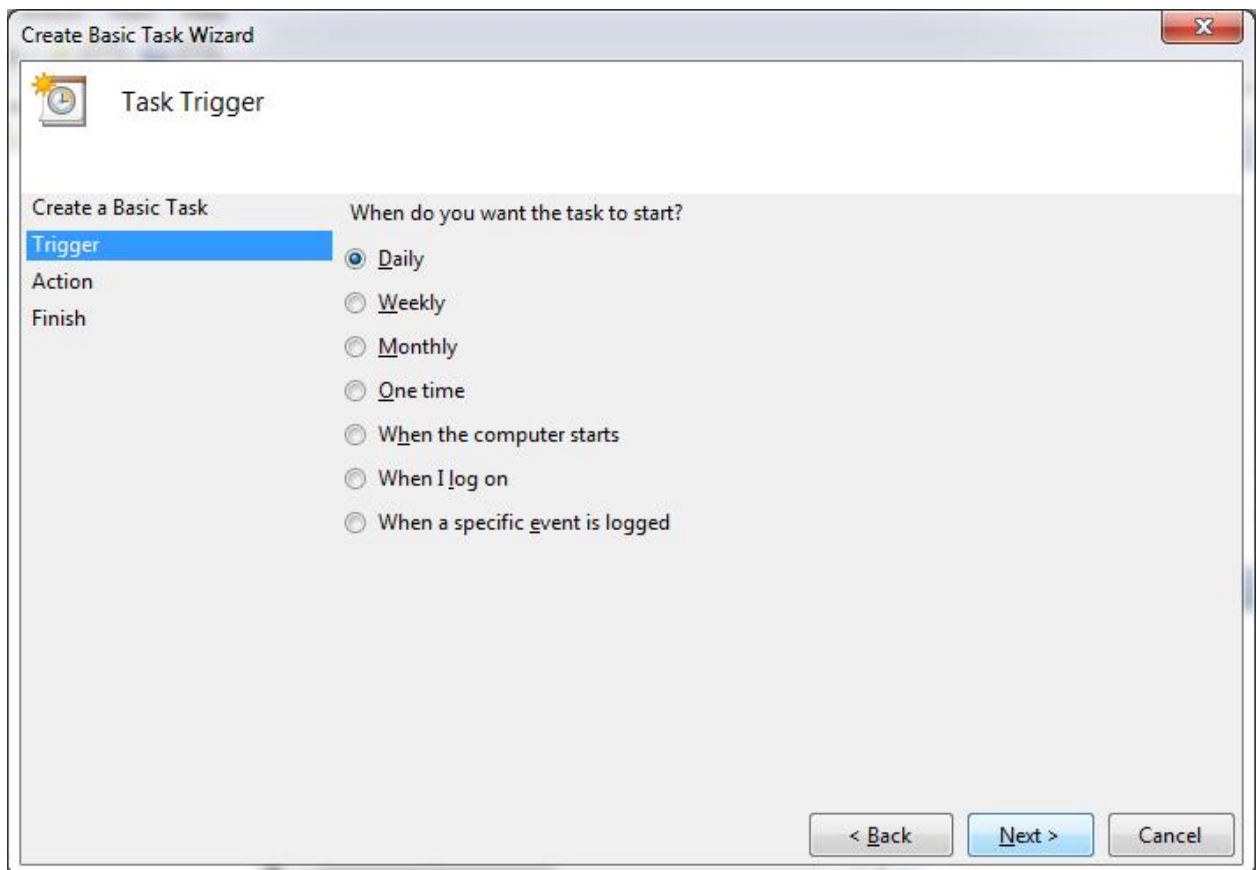

3. Silakan beri nama dan deskripsi untuk *task* yang Anda buat, kemudian *Next*.

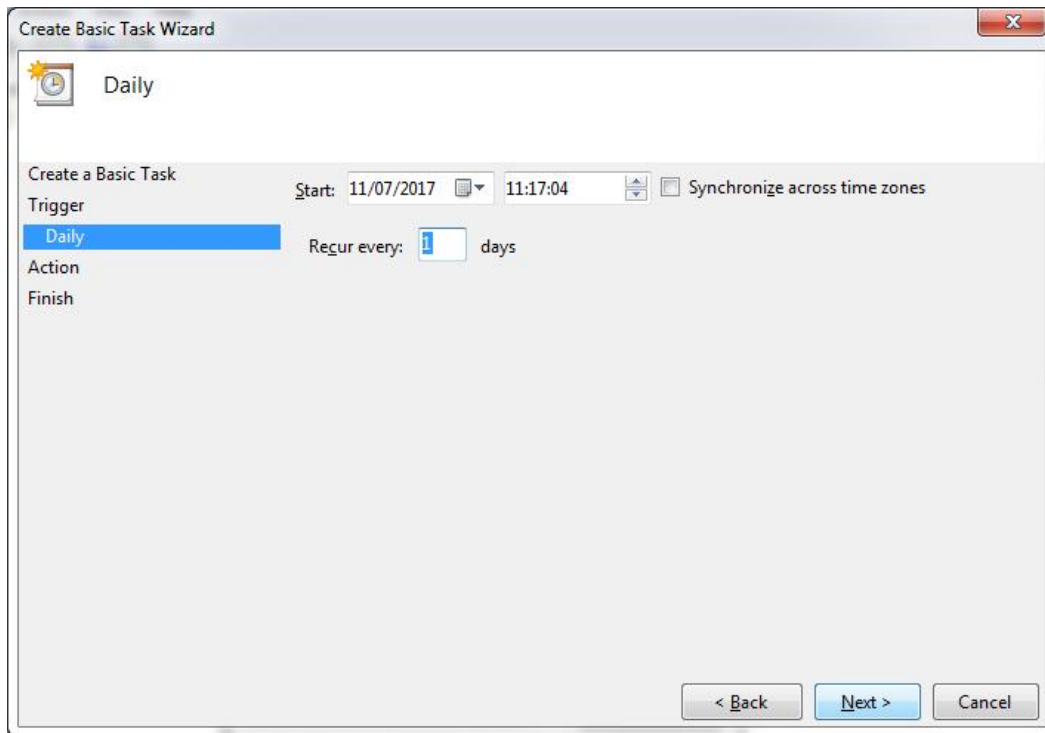

The screenshot shows the 'Create Basic Task Wizard' window. The title bar reads 'Create Basic Task Wizard'. Inside the window, there is a sidebar on the left with three options: 'Create a Basic Task' (which is selected and highlighted in blue), 'Trigger', 'Action', and 'Finish'. The main area of the wizard contains the following text: 'Use this wizard to quickly schedule a common task. For more advanced options or settings such as multiple task actions or triggers, use the Create Task command in the Actions pane.' Below this text, there are two input fields. The first is labeled 'Name:' and contains the text 'Curl php'. The second is labeled 'Description:' and contains the text 'Memanggil file php menggunakan curl'. At the bottom right of the window, there are three buttons: '< Back', 'Next >' (which is highlighted in blue), and 'Cancel'.

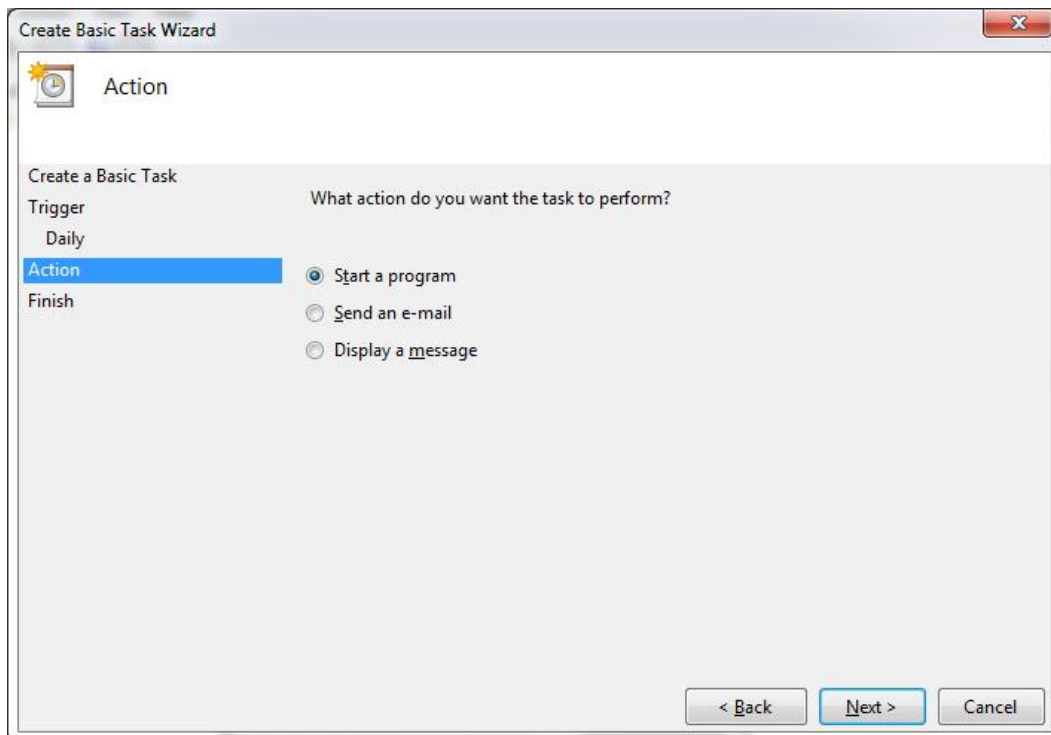

4. Pada halaman selanjutnya Anda dapat memilih waktu kapan *task* akan dijalankan. Daily, Weekly, Monthly dst. Untuk contoh ini saya memilih Daily.

5. Tentukan waktu kapan *task* akan mulai dieksekusi dan kapan task akan diulang kembali, kemudian *Next*. Lihat gambar.

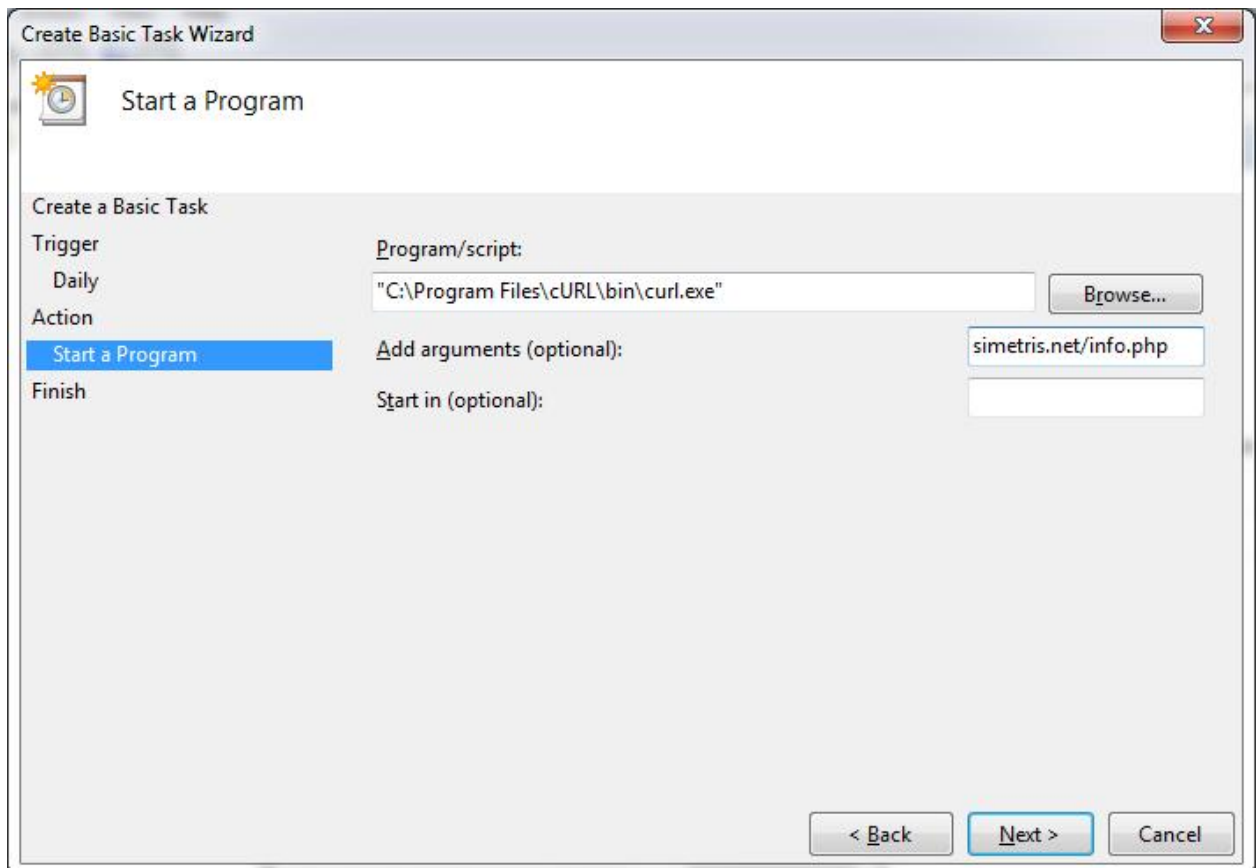

6. Silakan pilih “Start a program” pada halaman pilihan ini.

7. Pada bagian action silakan pilih “Program” dan arahkan ke curl.exe yang telah kita Install sebelumnya. Pada contoh ini letak file tersebut pada direktori “C:\Program Files\cURL\bin\curl.exe”.

Pada bagian “Add arguments” silakan isi dengan alamat url yang akan diakses. Contohnya pada kasus ini adalah *simetris.net/info.php*, kemudian *Next*.

8. Silakan review task yang Anda buat pada halaman terakhir, jika sudah yakin silakan tekan *finish*.

The screenshot shows the 'Create Basic Task Wizard' window with the 'Summary' tab selected. The window has a title bar with a close button. On the left, there is a sidebar with icons for 'Trigger', 'Daily', 'Action', 'Start a Program', and 'Finish'. The 'Finish' option is highlighted in blue. The main area contains the following fields:

- Name:** Curl php
- Description:** Memanggil file php menggunakan curl
- Trigger:** Daily; At 11:17 every day
- Action:** Start a program; "C:\Program Files\cURL\bin\curl.exe" http://simetris.net/inf

Below the action field, there is a checkbox labeled 'Open the Properties dialog for this task when I click Finish'. Below the checkbox, a note states: 'When you click Finish, the new task will be created and added to your Windows schedule.' At the bottom right, there are three buttons: '< Back', 'Finish', and 'Cancel'.
